## García Trucking gets clients moving toward success

BY MARIO BELAVAL DÍAZ

García Trucking's success throughout its 40 years as the largest trucking company in Puerto Rico is the result of the firm's ability to expand and diversify according to market changes and client needs. Still, one constant element has driven this success: unmatched one-stop-shop service that serves all types of clients.

"With us there is no need to pick a company here and another there for different services, because we provide transportation, moving, storage and rigging solutions with total quality service and dedication," said Anthony Rodríguez, sales manager at García Trucking Service Inc. (GTS), adding that the Carolina-based company moves some 300 containers a day. "I can safely say there is no other company in Puerto Rico that can offer the wide range of services that we provide, combined with tailor-made solutions that fit client needs,

which is why the largest companies in Puerto Rico join us as our clients."

GTS' client roster is an impressive list of businesses and enterprises that provide essential services to move the local economy and satisfy the needs of all who call Puerto Rico home, such as pharmaceutical companies, food & beverage distributors, petroleum companies and other multinational and local firms. GTS is also the largest military agent in Puerto Rico, representing 62 military carriers and handling more than half the moving jobs for military personnel on the island. The firm has a state-of-the-art fleet of more than 100 vehicles that take on heavy hauling, refrigerated cargo, dry containers, machinery, hazardous material, oversize loads and much more.

"The vehicles are also equipped with global positioning system, giving us the capability to monitor not only the locations but also the speed, direction of movement, safe driving and many other aspects

of the entire fleet," Rodríguez said. "That allows us to really run and move our clients' cargo in a coordinated, efficient manner, following it in every step of the journey, from start to finish."

GTS' available rental equipment includes dry & refrigerated containers, tilt-bed trucks, tractors, flatbed trailers, low-bed trailers and vans, as well as air-ride trucks, tractors and containers.

Another area where GTS has taken the lead in the industry is expert rigging services. In fact, as a member of the Specialized Carriers & Rigging Association and American Moving & Storage Association, GTS stands out and ahead of the competition in providing solutions such as complete industrial-machinery installations, plant relocations, hauling and heavy hoisting services. Add GTS' cleanroom certification and expert skills in handling such medical equipment as CT (computed tomography) scanners, MRI (magnetic resonance imaging) machines and other X-ray equipment. ■
